

## Special Issue on Phytotoxin

### Call for Papers

Every year countless people get sick or even die because of toxins that produced by plants. Most toxins are secondary metabolites and the by-products of primary physiological processes of plants. The chemical nature of these metabolites range from low molecular weight compounds, such as alkaloids, terpenes, amino acids and so on, to high molecular weight compounds such as proteins and glycoproteins. Because of the close relevance to our daily life, further study on **phytotoxin** shows great value and necessity to researchers.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **phytotoxin**. Potential topics include, but are not limited to:

- Poisonous plants
- Resource of phytotoxins
- Classification of phytotoxins
- Separation and identification of phytotoxins
- Plant defense mechanism
- Diseases caused by phytotoxins
- Diagnose and treatment
- Food poisoning

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Phytotoxin**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 26th, 2014
Publication Date	October 2014

Scientific Research  
*Open Access*

**American Journal of  
Plant Sciences**  
ISSN Online: 2158-2750
