

## Special Issue on Plant Molecular Biology

### Call for Papers

**Plant Molecular Biology** is the kind of biological science that deals with the molecular basis of plant biological activity. This field covers discoveries in genomics, proteomics, metabolomics, bioinformatics and so on. Plant molecular biology has tremendous value not only in the investigation of basic scientific questions, but also in application to production. The prospect of research on plant molecular biology is bright. As one of the important branches of plant science, **plant molecular biology** is of great attractions to researchers.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **plant molecular biology**. In this special issue, potential topics include, but are not limited to:

- Plant molecular biology techniques
- Genomics
- Proteomics
- Metabolomics
- Bioinformatics
- Applications and prospect

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Plant Molecular Biology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 4th, 2014
Publication Date	February 2015
