Special Issue on Plant Morphology

Call for Papers

Plant Morphology is also known as Phyto Morphology, explains the study of external structure. Plant Morphology also explains the Physical form of plants. Plant Morphology is very useful in identification of plants visually. It is the study of structure, development and form of plants. Four Major areas of investigations are there in this field and each area overlaps with other area of biological sciences. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of plant morphology.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore plant morphology. In this special issue, potential topics include, but are not limited to:

- Plant evolution
- The vegetative structures include root system and shoot system
- The somatic (vegetative) structure of plains and reproductive of plants
- Plant systematic and biodiversity
- The structure of plants at ranges
- Plant anatomy

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Plant Morphology” should be selected during your submission.
