Special Issue on Plant Protection

Call for Papers

Plant Protection is a scientific discipline that encompasses the study and application of measures to safeguard plants from pests, diseases, and other factors that may cause damage or reduce their productivity. This field is crucial for ensuring sustainable agriculture, protecting natural ecosystems, and preserving plant health in various settings, including agricultural, horticultural, and forestry systems. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **plant protection**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **plant protection**. In this special issue, potential topics include, but are not limited to:

- Control of plant virus diseases
- Endangered plant protection
- Phytopathology
- Phytochemical protection
- Managing and controlling pests and diseases in crops
- Formulating, coordinating and implementing the agrochemicals regulations
- Weed science
- Chemical plant protection and sustainability
- Insect pest management
- Plant health and diagnostics
- Plant quarantine and biosecurity
- Sustainable plant protection

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Plant Protection***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	March 8th, 2024
Publication Date	May 2024
