

Special Issue on Computer Mathematics

Call for Papers

As scientific and technological tools, computers have proved so useful. Within computer science there is a group of theoreticians who build mathematical models of computational processes. It involves a new way of thinking about computational schemes that is partly technological and partly mathematical but contains a unique ingredient that differs qualitatively from those of traditional disciplines.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Computer Mathematics**.

Authors should read over the journal's [Author's Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue — Computer Mathematics**” should be chosen during your submission.

According to the following timetable:

Manuscript Due	August 20th, 2013
Publication Date	October 2013
