Special Issue on Geometry & Topology

Call for Papers

Geometry is a branch of mathematics that studies the shape of a single object, the spatial relationship between different objects, and the nature of the surrounding space. Topology is an important subject closely related to traditional geometry, and it is also the research foundation of all geometry. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Geometry & Topology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geometry & Topology**. Potential topics include, but are not limited to:

- Algebraic topology
- Analytic geometry
- Computational geometry
- Differential topology
- Discrete geometry
- General topology
- Geometric group theory
- Geometric topology
- Plane geometry and solid geometry
- Real and functional analysis
- Symplectic manifolds
- Topological spaces
- Applications

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Geometry & Topology***" should be selected during your submission.

Special Issue Timetable:

Submission Deadline	February 6th, 2024
Publication Date	April 2024

Scientific Research
Open Access
