

Special Issue on
Mathematical and Computational Applications
Call for Papers

Mathematical and Computational Applications is devoted to studying the mathematical and/or computational techniques, with the application in various fields including engineering, physics, chemistry, biology, administrative sciences, economics, political sciences, etc. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Mathematical and Computational Applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Mathematical and Computational Applications**. Potential topics include, but are not limited to:

- Applied mathematics
- Classical mechanics
- Computational techniques
- Differential equations
- Electronic computers
- Evolutionary algorithms
- Finite element methods
- Machine learning and data mining
- Mathematical and computational modeling
- Neural networks
- Numerical simulation
- Optimization and control

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Mathematical and Computational Applications***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	July 30th, 2024
Publication Date	September 2024
