# Special Issue on Calculus and Analysis

# Call for Papers

Calculus and Analysis aims to present advanced research and developments in both theoretical and applied aspects of mathematical analysis. This includes foundational studies in differential and integral calculus, real and complex analysis, functional analysis, and numerical methods. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Calculus and Analysis.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Calculus and Analysis**. Potential topics include, but are not limited to:

- Real analysis
- Complex analysis
- Functional analysis
- Differential equations
- Measure theory
- Numerical analysis
- Vector analysis
- Tensor analysis
- Calculus of variations
- Harmonic analysis
- Applications in physical sciences
- Applications in signal processing
- Applications in other fields

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Calculus and Analysis***" should be selected during your submission.

Special Issue Timetable:

| Submission Deadline | October 23rd, 2025 |
|---|---|
| Publication Date | December 2025 |

**Scientific Research**
*Open Access*

**Guest Editor:**

Dr. Omole Ezekiel Olaoluwa

Department of Physical Sciences, Mathematics Program

Landmark University, Omu-Aran, Nigeria
