

## Special Issue on Sports and Children Development

### Call for Papers

Children's participation in sports is an important part of mass sports. Children at different ages have different morphological, physical and psychological characteristics, and their sports activities also feature different contents and forms. Children's participation in sports is not only beneficial to the development of their childhood form, functions and various abilities, but also affects their future sports development, as well as the effectiveness and level of mass sports development in a country and a nation. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Sports and Children Development**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Sports and Children Development**. Potential topics include, but are not limited to:

- Movement skill acquisition
- Stress in youth sport
- Developmental sport psychology
- Children and sports training
- Childhood growth and motor development
- Physical activity and fitness enhancement
- Effective teaching and lesson planning

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Sports and Children Development**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	September 21st, 2020
Publication Date	November 2020
