### Table of Contents

**Volume 4   Number 6   June 2014**

- **A New Integral Equation for the Spheroidal Equations in Case of m Equal to 1**  
  G. H. Tian, S. Q. Zhong

- **A Solution of Generalized Cosine Equation in Hilbert’s Fourth Problem**  
  R. Aramyan

- **A Note on the Height of Transitive Depth-One Graded Lie Algebras Generated by Their Local Parts**  
  T. B. Gregory

- **Convergence Theorem of Hybrid Iterative Algorithm for Equilibrium Problems and Fixed Point Problems of Finite Families of Uniformly Asymptotically Nonexpansive Semigroups**  
  H. B. Liu, Y. Li

- **Derived Categories in Langlands Geometrical Ramifications: Approaching by Penrose Transforms**  
  F. Bulnes

- **Structure of Groups with Generalized Normal Subgroups**  
  M. Arshaduzzaman

- **Time-Domain Analysis of the Periodically Discontinuously Forced Fractional Oscillators**  
  Z. Trzaska

- **Existence and Uniqueness of Positive Solution for Third-Order Three-Point Boundary Value Problems**  
  T. C. Hu, Y. P. Sun

- **On a Class of Gronwall-Bellman Type Inequalities**  
  Z. A. Khan

- **On Some Properties of Digital Roots**  
  I. M. Izmirli

---

The figure on the front cover is from the article published in Advances in Pure Mathematics, 2014, Vol. 4, No. 6, pp. 269-281 by Zdzislaw Trzaska.
Advances in Pure Mathematics (APM) is an international journal dedicated to the latest advancements in ordered algebraic structures. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of ordered algebraic structures.

Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- Applied Harmonic Analysis
- Approximation Theory
- Asymptotic Methods
- Bifurcation Theory
- Coding Theory
- Combinatorics
- Complex Analysis
- Convex Analysis
- Difference Equations
- Differential Equations
- Dynamical Systems
- Fixed-Point Theory
- Fourier Analysis
- Fractals
- Fractional Analysis
- Functional Differential Equations
- Fuzzy Mathematics
- Geometry
- Geometry of Banach Spaces
- Integral Equations
- Mathematical Biology, including Population Dynamics
- Mathematical Physics
- Matrix Theory
- Moment Theory
- Number Theory
- Numerical Analysis
- Operator Theory
- Optimal Control
- Optimization Wavelets
- Partial Differential Equations
- Probability
- Reaction-Diffusion Problems, Discrete Mathematics
- Scattering Theory
- Semigroups of Operators
- Signal Theory
- Special Functions
- Statistics
- Stochastic Process
- Topology and Applications
- Transport Theory
- Ultrametric Analysis
- Variational Methods

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the APM.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

Website and E-Mail

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
