

Special Issue on Biodegradation and Bioremediation

Call for Papers

Biodegradation and bioremediation is associated with environmentally-friendly products, capable of decomposing back into natural elements. It involves techniques of the use of organisms in biomedicine, waste management, ecology, and environmental pollution.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Biodegradation and Bioremediation**. Potential topics include, but are not limited to:

- Bacteria and bioremediation processes
- Biodegradable technology
- Microbial communities
- Pollution treatment
- Heavy metal bioremediation
- Phytoremediation
- Biodegradable materials
- Bioremediation of soil contamination
- Anaerobic biodegradation
- Applications in environment, agriculture and industries

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Biodegradation and Bioremediation**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 23rd, 2020
Publication Date	January 2021
