

Special Issue on Bacteria and Infections

Call for Papers

Bacteria cause many common infections such as pneumonia, wound infections, bloodstream infections (sepsis) and sexually transmitted diseases, and have also been responsible for several major disease epidemics

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Bacteria and Infections**. Potential topics include, but are not limited to:

- Management of bacterial infections
- Cause and diagnosis
- Bacterial pathogenesis
- Bacterial genomics
- Bacterial toxins
- Host–pathogen interaction
- Antibiotic resistance
- Primary immunodeficiency
- Bacterial pneumonia
- Bacterial gastroenteritis
- Bacterial skin infections
- Foodborne pathogens
- Escherichia coli Infections
- Salmonella infection
- Sexually transmitted bacterial infections
- Epidemics and control
- Infections, public health and prevention

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Bacteria and Infections**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 13th, 2022
