Special Issue on Education and Information Technologies

Call for Papers

Information technology has the ability to enhance relationships between teachers and students. Information technology helps make teaching and learning more meaningful and fun. Information technology has affected changes to the methods, purpose and perceived potential of education.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Education and Information Technologies. Potential topics include, but are not limited to:

- Online learning and distance education
- Digital platforms and tools
- Virtual classrooms and labs
- Web-based Learning
- Blended learning
- Interactive Learning
- Collaborative Learning
- Computer-assisted learning
- Artificial intelligence in education
- ICT in education
- Multi-media and digital technologies
- Mobile applications and learning
- Education and information systems
- Big data technologies for education
- Game-based learning
- Social media in education
- Education, IT, and the COVID-19 pandemic

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Education and Information Technologies” should be chosen during your submission.
