

## Special Issue on Industrial Engineering

### Call for Papers

The goal of **industrial engineering** is to improve the production efficiency and deal with the optimization of complex processes or systems. The industrial engineers include various topics about management science, work-study, financial engineering, engineering management, supply chain management, process engineering, operations research, systems engineering, cost and value engineering, quality engineering, and the facilities planning. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **industrial engineering**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **industrial engineering**. In this special issue, potential topics include, but are not limited to:

- Engineering analysis
- Working standard
- Method study
- Work measurement
- Engineering design process
- Plant layout, handling design

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Industrial Engineering**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 10th, 2014
Publication Date	November 2014
