

Special Issue on Reliability, Quality and Safety Engineering

Call for Papers

Reliability engineering is a sub-discipline of systems engineering that emphasizes the ability of equipment to function without failure. Reliability describes the ability of a system or component to function under stated conditions for a specified period of time. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **Reliability, Quality and Safety Engineering**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Reliability, Quality and Safety Engineering**. In this special issue, potential topics include, but are not limited to:

- Reliability and availability program plan
- Reliability requirements
- Reliability prediction and improvement
- Reliability modeling
- Reliability testing
- Software reliability
- Reliability operational assessment

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Reliability, Quality and Safety Engineering**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 30th, 2024
Publication Date	October 2024
