

Special Issue on Construction Engineering

Call for Papers

Construction engineering deals with the designing, planning, construction and management of infrastructures such as roads, tunnels, bridges, airports, railroads, facilities, buildings, dams, utilities and other projects. The goal of this special issue is to provide a platform for scientists and academics all over the world to promote, share and discuss various new issues and developments in **construction engineering**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **construction engineering**. In this special issue, potential topics include, but are not limited to:

- Building physics
- Civil engineering materials
- Concrete structure design
- Building architecture
- Building structure
- Architectural planning
- Construction management
- Design-construction integration
- Engineering and design of sustainable built systems

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Construction Engineering**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 20th, 2024
Publication Date	November 2024
