

Special Issue on Energy Efficiency and Saving

Call for Papers

Energy efficiency simply means using less energy to perform the same task – that is, eliminating energy waste. Energy efficiency brings a variety of benefits: reducing greenhouse gas emissions, reducing demand for energy imports, and lowering our costs on a household and economy-wide level. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **energy efficiency and saving**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **energy efficiency and saving**. In this special issue, potential topics include, but are not limited to:

- Energy generation and distribution
- Energy conservation
- Energy-efficient appliances
- Energy-efficient building design
- Energy saving technology
- Analysis and modeling of energy efficiency performance
- Energy management systems and energy services
- Energy markets and risk assessment
- Emerging technologies and approaches to improve energy efficiency

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Energy Efficiency and Saving**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 23rd, 2024
Publication Date	May 2024
