Forensic Medicine and Anatomy Research (FMAR) is a peer-reviewed, open access journal. The goal of this journal is to provide a platform for doctors and academicians all over the world to promote, share, and discuss original investigations, observations, scholarly inquiries, reviews and developments in the various branches of the anatomy sciences and forensic sciences.

All manuscripts must be prepared in English, and are subject to a rigorous peer-review process. Accepted papers will immediately appear online followed by printed in hard copy. The areas covered by Forensic Medicine and Anatomy Research (FMAR) include but are not limited to the following fields:

- Anatomical Sciences
- Anatomy and Physiology
- Clinical Anatomy
- Clinical Forensic Medicine
- Forensic Analytical Chemistry
- Forensic Anthropology
- Forensic Biology
- Forensic Education
- Forensic Entomology
- Forensic Genetics
- Forensic Microbiology
- Forensic Odontology
- Forensic Osteology
- Forensic Pathology
- Forensic Physical Evidence
- Forensic Psychiatry
- Forensic Radiology
- Forensic Serology
- Forensic Sociology
- Forensic Thanatology
- Forensic Toxicology
- Gross Anatomy
- Histology
- Neuroanatomy
- Periodontal Anatomy
- Sectional and Imaging Anatomy
- Surgical and Radiologic Anatomy

We are also interested in: 1) Short Reports – 2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews – Comments and critiques.
