Special Issue on Plant Food, Nutrition and Health

Call for Papers

Plant foods refer to foods that use plant seeds, fruits or tissue parts as raw materials to provide energy for human beings after processing. It mainly includes grains, potatoes, beans and their products, fruit and vegetable products, tea and so on. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Plant Food, Nutrition and Health.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Plant Food, Nutrition and Health. Potential topics include, but are not limited to:

- Fruits and nutrition
- Grain, bean and maize
- Nutritional quality of vegetables
- Phytochemicals in nutrition and health
- Plant food processing and storage
- Plant food protein engineering
- Plant foods for human nutrition
- Plant-based foods
- Types of plant foods
- Vegetable production
- Vegetarian diet
- Vitamins, minerals and dietary fiber

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Plant Food, Nutrition and Health” should be selected during your submission.
