

## Special Issue on Geographical Environments

### Call for Papers

Environmental geography may be defined as that branch of geography which studies the characteristics, compositions and functions of different components of the natural environmental system, mutual interdependence of different components, various processes that link the components, the interactions of different components with each other and among themselves and consequent responses in spatial and temporal context in terms of 'geoecosystem' as well as interactions of technologically advanced 'economic man' with different components of natural 'geoecosystem' and resultant modifications and changes in the natural geoecosystem leading to environmental degradation and pollution, the techniques and strategies of pollution control measures and management of ecological resources.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **geographical environments**. In this special issue, potential topics include, but are not limited to:

- Natural geographical features
- Topography and geomorphology
- The differences of geographical environment
- Natural environmental system
- Climate, land and water
- Lithosphere, hydrosphere, pedosphere, atmosphere

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Geographical Environments**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	June 27th, 2018
Publication Date	August 2018
