

Special Issue on Sustainable Development of Environment

Call for Papers

Environmental sustainability means that we are living within the means of our natural resources. To live in true environmental sustainability, we need to ensure that we are consuming our natural resources, such as materials, energy fuels, land, water...etc, at a sustainable rate. Some resources are more abundant than others and therefore we need to consider material scarcity, the damage to environment from extraction of these materials and if the resource can be kept within Circular Economy principles. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Sustainable Development of Environment**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Sustainable Development of Environment**. In this special issue, potential topics include, but are not limited to:

- The population and sustainable development
- Urban ecological sustainable development
- Energy and sustainable development
- Natural resources sustainable development
- Water resources sustainable development
- Sustainable development strategy
- Economic growth and environmental sustainability
- Ecosystem protection and restoration
- Energy and climate change
- Environmental risk management
- Environmental sustainable development planning

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Sustainable Development of Environment**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 26th, 2023
Publication Date	July 2023

Scientific Research
Open Access

**Journal of Geoscience and
Environment Protection**
ISSN Online: 2327- 4344
