Special Issue on Remote Sensing Technology

Call for Papers

As remote sensing technologies have advanced in recent years to include new both modalities and data with increased spatial and spectral resolution, there has been a parallel growth in development of methods to improve preprocessing of data, extract information, and integrate products into models and decision support systems. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Remote Sensing Technology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Remote Sensing Technology. In this special issue, potential topics include, but are not limited to:

- Types of data acquisition techniques
- Data characteristics
- Data processing
- Applications of remote sensing in coastal
- Applications of remote sensing in ocean
- Applications of remote sensing in hazard assessment
- Applications of remote sensing in natural resource management

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue - Remote Sensing Technology” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>August 19th, 2023</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>October 2023</td>
</tr>
</tbody>
</table>
