

Special Issue on Green Catalysts and Applications

Call for Papers

In chemistry, catalyst is any substance that causes or accelerates a chemical reaction without itself being consumed. Catalyst is not consumed in the reaction and remains unchanged after it. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Green Catalysts and Applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Green Catalysts and Applications**. Potential topics include, but are not limited to:

- Biocatalysis
- Biomass catalysis
- Catalysts for environmental applications
- Electrocatalysts
- Enzymes and biocatalysts
- Organocatalysts
- Photocatalysts
- Photocatalytic nanomaterials
- Sustainable catalysts for biofuel production

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Green Catalysts and Applications**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	January 12th, 2022
Publication Date	March 2022
