

Special Issue on Alternative and Sustainable Fuels

Call for Papers

Alternative and sustainable fuels are alternatives to conventional fossil fuels that are environmentally friendly, renewable, and have a lower carbon footprint. The development and adoption of alternative and sustainable fuels are crucial for reducing dependence on fossil fuels, mitigating climate change, and achieving a more sustainable energy system. Continued research, development, and investment in these fuels are essential to accelerate the transition to a cleaner, more sustainable future. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Alternative and Sustainable Fuels.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Alternative and Sustainable Fuels**. Potential topics include, but are not limited to:

- Alcohols
- Biodiesel
- Biofuel
- Biogas
- Biomethane
- Carbon capture and utilization
- Charcoal
- Fuel cell technology
- Gaseous fuels
- Gasoline
- Hydrogen fuel
- Liquefied hydrogen
- Liquid fuels
- Methane
- Natural gas
- Petroleum
- Renewable energy
- Shale gas
- Solar fuels
- Solid fuels
- Syngas
- Waste-to-energy
- Water gas

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Alternative and Sustainable Fuels**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	November 16th, 2023
Publication Date	January 2024
