## Special Issue on Sport and Exercise Medicine

### Call for Papers

Sports medicine is a branch of medicine that deals with physical fitness and the treatment and prevention of injuries related to sports and exercise. Exercise is physical activity that is planned, structured, and repetitive for the purpose of conditioning the body. Exercise is essential for improving overall health, maintaining fitness, and helping to prevent the development of many diseases.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Sport and Exercise Medicine**. Potential topics include, but are not limited to:

- Exercise physiology
- Health & kinesiology
- Orthopaedics and traumatology
- Physical and rehabilitation medicine
- Sports and exercise nutrition
- Sports injury treatment
- Injury prevention
- Surgical management
- Bone and muscle health
- Physiotherapy and exercise therapy
- Interventional therapies
- Exercise and chronic disease management
- Sports psychology
- Physical and mental health
- Sports and cardiology
- Athletes health
- Weight management
- Performance enhancement & exercise testing
- Assessment of physical activity
- Exercise, lifestyle and health promotion

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Sport and Exercise Medicine**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	July 15th, 2021
Publication Date	September 2021

For publishing inquiries, please feel free to contact the Editorial Assistant at [submission.entrance1@scirp.org](mailto:submission.entrance1@scirp.org)
