

Special Issue on Public Health and Risk Management

Call for Papers

Risk management in healthcare comprises the clinical and administrative systems, processes, and reports employed to detect, monitor, assess, mitigate, and prevent risks. A systematic process of organizing, forecasting, evaluating information and identification of procedures to avoid or minimize the potential impact can support risk management. The risks or threats arise from a wide variety of sources like legal liabilities, financial uncertainty, strategic management errors, accidents, natural disasters, environmental hazards, etc.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Public Health and Risk Management**. Potential topics include, but are not limited to:

- Quantitative risk assessment
- Intervention strategies
- Public health statistics and risk assessment
- Management of emerging public health issues and risks
- Epidemiology in health risk assessment
- Occupational & environmental health risk management
- Risk management and healthcare policy
- Risk management, health and safety
- Risk management of COVID-19 and public health
- Health system risk management
- Healthcare enterprise risk management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Public Health and Risk Management**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 17th, 2022
Publication Date	July 2022
