

Special Issue on COVID-19 and Public Health

Call for Papers

Coronavirus disease 2019 (COVID-19) is a contagious disease caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). The first known case was identified in Wuhan, China, in December 2019. The disease has since spread worldwide, leading to an ongoing pandemic. The outbreak was declared a Public Health Emergency of International Concern. Public health and social measures have proven critical to limiting transmission of COVID-19 and reducing deaths.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **COVID-19 and Public Health**. Potential topics include, but are not limited to:

- Epidemiology
- Technology and testing
- Public health interventions
- Clinical management
- Public health emergency
- Prevention and control
- Public health surveillance
- International public health challenge
- Public health awareness
- Health education and promotion
- Health informatics
- Statistics & risk modeling
- Vaccination
- Post-COVID-19 conditions
- Public health and social measures
- Psychological consequences
- Physical rehabilitation
- Health systems

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – COVID-19 and Public Health**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 3rd, 2023
Publication Date	June 2023
