## Special Issue on Management Information Systems

### Call for Papers

A management information system (MIS) is an information system used for decision-making, and for the coordination, control, analysis, and visualization of information in an organization. The study of management information systems examines people, processes and technology in an organizational context.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Management Information Systems**. Potential topics include, but are not limited to:

- MIS and decision making
- MIS with business intelligence and analytics
- E-commerce and MIS
- Decision support system
- Information systems and organizational management
- Information processing and management
- Information system design and implementation
- Knowledge management system
- Executive information systems
- Marketing information systems
- Accounting in management information systems
- Human resource management systems
- Enterprise resource planning
- Supply chain & information systems
- Customer relationship management
- Project management information system

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Management Information Systems**” should be chosen during your submission.

According to the following timetable:

Scientific Research  
*Open Access*

**Intelligent Information  
Management**

ISSN Online: 2160-5920
