

Special Issue on Pediatric Surgery Research

Call for Papers

Pediatric Surgery is the branch of surgery concerned with performing surgery on children. It treats children from the newborn stage through late adolescence. There are many subspecialties of pediatric surgery, including pediatric cardiothoracic surgery, pediatric orthopedic surgery and many others. Children are not just small adults. They cannot always say what is bothering them. They cannot always answer medical questions, and not always able to be patient and helpful during a medical examination. So it is most important to give best care for children. This special issue will be focused on studying different applied aspects of pediatric surgery, including basic theoretical concepts, and their techniques.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **pediatric surgery research**. Potential topics include, but are not limited to:

- Pediatric bariatric surgery
- Stem cells exploitation for pediatric surgery
- Techniques of pediatric surgery
- Development of pediatric surgery
- Surgical skills of pediatric surgery
- Management of pediatric surgery
- Assessment of pediatric surgery
- Case study

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Pediatric Surgery Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 28th, 2014
Publication Date	October 2014

Scientific Research
Open Access

**International Journal
of Clinical Medicine**

ISSN Online: 2158-2882
