

Special Issue on Clinical Medicine and Surgery

Call for Papers

Surgery is a medical specialty that uses operative manual and instrumental techniques on a person to investigate or treat a pathological condition such as a disease or injury, to help improve bodily function or appearance or to repair unwanted ruptured areas.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Clinical Medicine and Surgery**. Potential topics include, but are not limited to:

- Clinical signs in surgery
- Surgery in clinical research
- Clinical evaluation of reconstruction methods
- Minimally invasive surgery and clinical outcome
- Transplant research and clinical studies
- Risk and safety in clinical surgery
- Characteristics of randomized clinical trials
- Clinical practice
- Advanced technology and clinical applications
- Enhanced recovery after surgery
- Survival after laparoscopic surgery or open surgery
- Clinical predictors of major infections after surgery
- Clinical nutrition in surgery
- Clinical medicine, surgery & community Health

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Clinical Medicine and Surgery**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 19th, 2021
Publication Date	January 2022
