Special Issue on Infectious Diseases Clinical Research

Call for Papers

Infectious disease, in medicine, a process caused by an agent, often a type of microorganism, that impairs a person’s health. In many cases, infectious disease can be spread from person to person, either directly or indirectly. Infectious disease clinical research covers research on the pathogenesis, clinical investigation, medical microbiology, diagnosis, immune mechanisms, and treatment of diseases caused by infectious agents.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Infectious Diseases Clinical Research. Potential topics include, but are not limited to:

- Diagnosis and treatment
- Clinical trials
- Clinical infection in practice
- Clinical microbiology and infection
- Clinical epidemiology
- Clinical virology
- Molecular biology
- Pathogenesis
- Clinical immunology
- Allergy and infectious diseases
- Host–pathogen interactions
- Transmission, prevention and control
- Infectious complications
- Vaccination
- Tropical diseases
- Influenza
- HIV/AIDS
- COVID-19 clinical research
- Risk factors

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.
Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Infectious Diseases Clinical Research” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>September 12th, 2022</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>November 2022</td>
</tr>
</tbody>
</table>
