

Special Issue on Management Information System

Call for Papers

Management information system has been widely used in e-government, digital government, social network, the development of information society and so on. Its operation process mainly includes: information collection, information transmission, information storage, information processing, information maintenance and use of information. MIS attaches importance to the empirical method and uses the mathematical model to analyze the complex social and enterprise problems. In the future, MIS will not only be a management method or management technology, but will permeate all levels of management as a management thinking or management philosophy, and become the foundation of industrial innovation and development.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **management information system**. Potential topics include, but are not limited to:

- The principle of MIS
- Information system strategy
- Business analytics system
- Software development
- Information management model
- Analysis of information management process
- Information technology management
- Application of MIS

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Management Information System**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 26th, 2018
Publication Date	June 2018

Scientific Research
Open Access

**International Journal of
Communications, Network and
System Sciences**
ISSN Online: 1913-3723
