

Special Issue on Geophysics

Call for Papers

Geophysics deals with a wide array of geologic phenomena, including the temperature distribution of the Earth's interior; the source, configuration, and variations of the geomagnetic field; and the large-scale features of the terrestrial crust, such as rifts, continental sutures, and mid-oceanic ridges. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Geophysics**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geophysics**. In this special issue, potential topics include, but are not limited to:

- Exploration of coal, oil, gas and geothermal energy resources
- Groundwater and mineral deposits
- Assessment of earthquake hazards
- Regions of the Earth
- Earth and planetary processes
- Exploration geophysics and in soil and rock physics
- Applications of geophysical techniques

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Geophysics**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 30th, 2020
Publication Date	February 2021
