**Special Issue on**  
**Mathematical Physics and Computer Science**

**Call for Papers**

Computer-Oriented Mathematical Physics describes some mathematical models of classical physical phenomena, particularly the mechanics of particles. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Mathematical Physics and Computer Science** .

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Mathematical Physics and Computer Science** . In this special issue, potential topics include, but are not limited to:

- The development of theories and methods for computer and information sciences
- Theoretical informatics and discrete mathematics
- Cryptography, algorithmics, symbolic calculus
- Non-standard numeration systems
- Graphs and Networks
- Design, implementation, and analysis of algorithms
- Formal logic notation, proof methods

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Mathematical Physics and Computer Science**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 16th, 2022
Publication Date	February 2023

**Guest Editor:**
