

Special Issue on Space Geometry and Its Applications

Call for Papers

Geometry is the mathematics of shape and space. It's about the properties of objects (their angles and surfaces, for instance) and the consequences of how these objects are positioned (where their shadows fall, how people must move around them). The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Space Geometry and Its Applications**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Space Geometry and Its Applications**. In this special issue, potential topics include, but are not limited to:

- Vectors and the geometry of space
- Shape and space in geometry
- Euclidean space
- Equations of lines and planes
- Cylinders and quadric surfaces
- Cylindrical and spherical coordinates

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Space Geometry and Its Applications**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 20th, 2023
Publication Date	March 2023
