

Special Issue on Difference and Differential Equations

Call for Papers

In mathematics, a differential equation is an equation that relates one or more unknown functions and their derivatives. In applications, the functions generally represent physical quantities, the derivatives represent their rates of change, and the differential equation defines a relationship between the two.. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Difference and Differential Equations**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Difference and Differential Equations**. In this special issue, potential topics include, but are not limited to:

- Ordinary differential equations
- Partial differential equations
- Non-linear differential equations
- Stochastic differential equations
- Discrete and continuous dynamical systems
- Dynamics and differential equations
- Evolution equations and control theory
- Integral transforms and special functions
- Stability of generalized difference systems
- Applications of difference and differential equations

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue –Difference and Differential Equations**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 28th, 2023
Publication Date	June 2023

Guest Editor:

Scientific Research
Open Access

**Journal of Applied
Mathematics and Physics**
ISSN Online: 2327-4379
