

Special Issue on Algebra

Call for Papers

Algebra is a branch of mathematics dealing with symbols and the rules for manipulating those symbols. In elementary algebra, those symbols (today written as Latin and Greek letters) represent quantities without fixed values, known as variables. Just as sentences describe relationships between specific words, in algebra, equations describe relationships between variables. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Algebra**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Algebra**. In this special issue, potential topics include, but are not limited to:

- Number theory
- Geometry and analysis
- Pre-algebra
- Elementary algebra
- Abstract algebra
- Universal algebra
- Lie theory
- Coding theory
- Algebraic combinatorics
- Algebraic expressions
- Sequence and series

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Algebra**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	May 27th, 2024
Publication Date	July 2024

Guest Editor:

Scientific Research
Open Access

**Journal of Applied
Mathematics and Physics**
ISSN Online: 2327-4379
