## Special Issue on Central Nervous System: Function & Diseases

### Call for Papers

The central nervous system (CNS) is the part of the nervous system consisting of the brain and spinal cord. The CNS is so named because it integrates the received information and coordinates and influences the activity of all parts of the bodies of bilaterally symmetric animals. Central nervous system diseases are a group of neurological disorders that affect the structure or function of the brain or spinal cord, which collectively form the central nervous system (CNS).

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Central Nervous System: Function & Diseases**. Potential top

- Structure, function and diseases
- Molecular mechanism and pathogenesis
- Neurologic impairments and behavior assessment
- Cognitive dysfunction
- Peripheral and central nervous system
- Epilepsy research
- CNS cancer
- Alzheimer disease and Parkinson disease

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Central Nervous System: Function & Diseases**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 25th, 2020
Publication Date	July 2020

For publishing inquiries, please feel free to contact the Editorial Assistant at [submission.entrance1@scirp.org](mailto:submission.entrance1@scirp.org)
