Special Issue on Brain, Cognition and Behavior

Call for Papers

The academic topic of "Brain, Cognition, and Behavior" delves into the intricate connections between our neural structures, cognitive processes, and observable behaviors. This field examines how the brain processes and interprets information, shaping our thoughts, emotions, and actions. It explores how neural networks underlie cognitive functions and how these, in turn, influence our behaviors. Understanding these relationships is vital for enhancing our comprehension of the human mind and has implications for improving educational practices and addressing cognitive disorders.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Brain, Cognition and Behavior**. Potential topics include, but are not limited to:

- Cognitive neuroscience
- Behavioral neuroscience
- Psychophysiology of behavior
- Cognitive neuropsychology
- Neuropsychology of behavioral disorders
- Psychophysiology of behavior
- Social neuroscience
- Affective neuroscience
- Developmental cognitive neuroscience
- Cognitive aging and neurodegenerative disorders
- Cognitive rehabilitation
- Behavioral and brain functions
- Sensation, attention and perception
- Learning, memory and language
- Decision-making and reasoning
- Emotion, affect, and cognition
- Depression and anxiety
