Special Issue on Research on Antimicrobial Drugs

Call for Papers

Before the discovery of antimicrobials, many infectious diseases are a serious threat to the human health and life. An antimicrobial is an agent that kills microorganisms or stop their growth. Such drugs include anti-corrosive drugs and clinical treatment with antimicrobial drugs. With the development of society and the progress of science technology, a large number of antibiotics continue to emerge, clinical application is also increasingly widespread.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring Antimicrobial Drugs. Potential topics include, but are not limited to:

- Antibiotics
- Ideal antimicrobial drugs
- Anti-bacterial drugs, antifungal and antiviral drugs
- Vaccination
- Residual harm of antimicrobial drugs
- Application status of antimicrobial drugs
- Pathogen resistance and management

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue–Antimicrobial Drugs” should be chosen during your submission.

According to the following timetable:
