Special Issue on Cell and Cancer Research

Call for Papers

Cancer has biological characteristics such as abnormal cell differentiation, proliferation, uncontrolled growth, invasion and metastasis. Its occurrence is a multi-factor, multi-step complex process, which is divided into three processes: carcinogenesis, cancer promotion, and evolution. It is closely related to smoking, infection, occupational exposure, environmental pollution, unreasonable diet and genetic factors. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Cell and Cancer Research.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Cell and Cancer Research. Potential topics include, but are not limited to:

- Stem cells and cancer therapeutics
- Cancer biomarkers and targets
- Cancer immunotherapy
- Diet and cancer
- Causes of cancer
- Cancer signs and symptoms
- Smoking and cancer
- Cancer incidence and mortality
- Cancer prevention and control

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Cell and Cancer Research” should be selected during your submission.
