

Special Issue on Cell and Tissue Engineering

Call for Papers

Cell engineering is an important aspect of biological engineering. It applies the principles and methods of engineering to solve basic and applied problems of cell and molecular biology. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Cell and Tissue Engineering**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Cell and Tissue Engineering**. Potential topics include, but are not limited to:

- Cell and tissue culture
- Cell movement and motility
- Cell physiology
- Cell structure
- Cell growth and differentiation
- Tissue engineering and regenerative medicine
- Genetic disorders
- Cellular and molecular immunology
- DNA repair

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Cell and Tissue Engineering**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 9th, 2021
Publication Date	July 2021
