Special Issue on COVID-19 Symptoms, Treatment and Prevention

Call for Papers

Coronavirus disease (COVID-19) is an infectious disease. People infected with the virus will have varying degrees of symptoms, some of them will only have a fever or a slight cough and some will develop pneumonia. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of COVID-19 Symptoms, Treatment and Prevention.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring COVID-19 Symptoms, Treatment and Prevention. Potential topics include, but are not limited to:

- COVID-19 signs and symptoms
- COVID-19 vaccine
- Infection and transmission
- Complications of COVID-19
- Prevention, control and treatment
- Healthcare and rehabilitation
- Drug development and testing
- Immunity

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - COVID-19 Symptoms, Treatment and Prevention” should be selected during your submission.
