Special Issue on Medical Research and Bioscience

Call for Papers

Medical research, also known as experimental medicine, encompasses a wide array of research which includes biology, chemistry, pharmacology and toxicology with the goal of developing new medicines or medical procedures or improving the application of those already available. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Medical Research and Bioscience.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Medical Research and Bioscience. Potential topics include, but are not limited to:

- Angiology
- Biochemistry
- Biology
- Biomaterials
- Biostatistics
- Cancer
- Clinical trials
- Diabetes
- Endocrinology
- Epidemiology
- Genetics
- Health
- Immunology
- Microbiology
- Ophthalmology
- Otolaryngology
- Pharmacology
- Physiology
- Statistics and ethics
- Tissue engineering
- Toxicology
- Virology

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.
Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Medical Research and Bioscience” should be selected during your submission.
