Special Issue on

Biomedical, Biopharma and Clinical Research

Call for Papers

Biomedical, Biopharma and Clinical Research focuses on study of biologic medicine and any pharmaceutical drug product manufactured in, extracted from, or semisynthesized from biological sources, which includes vaccines, whole blood, blood components, allergens, somatic cells, gene therapies, tissues, recombinant therapeutic protein, and living medicines used in cell therapy. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Biomedical, Biopharma and Clinical Research.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Biomedical, Biopharma and Clinical Research. Potential topics include, but are not limited to:

- Adalimumab
- Biologics
- Biopharmaceutics
- Biosimilars
- Biologic medicine
- Erythropoietin
- Infliximab
- Insulin
- Interferons
- Interleukin-based products
- Monoclonal antibodies
- Trastuzumab
- Vaccines
- Viral gene therapy

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Biomedical, Biopharma and Clinical Research” should be selected during your submission.
Special Issue Timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>September 8th, 2022</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>November 2022</td>
</tr>
</tbody>
</table>
