Special Issue on Degenerative Diseases

Call for Papers

Degenerative disease is the result of a continuous process based on degenerative cell changes, which causes tissues or organs to deteriorate over time. It mainly includes such groups like: cardiovascular, neoplastic, muscular, skeletal, and nervous system. Many of degenerative diseases are associated with aging, or gets worse during the aging process. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Degenerative Diseases.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Degenerative Diseases. Potential topics include, but are not limited to:

- Alzheimer's disease
- Amyotrophic lateral sclerosis
- Atrophy
- Dementia
- Friedreich ataxia
- Huntington's disease
- Lewy body disease
- Neurodegenerative diseases
- Osteoarthritis
- Osteoporosis
- Parkinson's disease
- Retinitis pigmentosa
- Spinal muscular atrophy

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Degenerative Diseases” should be selected during your submission.

Special Issue Timetable:

| Submission Deadline | October 12th, 2022 |
