Special Issue on Immunology and Infectious Diseases

Call for Papers

Immunology is a branch of biology and medicine that focuses on basic immune mechanisms and molecular basis of immune diseases in all organisms. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Immunology and Infectious Diseases.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Immunology and Infectious Diseases. Potential topics include, but are not limited to:

- Viral infections
- Bacterial infections
- Fungal infections
- Parasitic infections
- Autoimmunity
- Allergies
- Autoimmune diseases
- Autoimmunity
- Erythematous
- Human immunodeficiency and autoimmune diseases
- Immune cell development and differentiation
- Immunoassay
- Immunodeficiency
- Immunology and immunopathology
- Immunotherapy
- Innate and adaptive immunity
- Veterinary immunology

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Immunology and Infectious Diseases” should be selected during your submission.

Special Issue Timetable:
Submission Deadline | November 30th, 2022  
Publication Date | January 2023
