Special Issue on Anesthesia Research

Call for Papers

Anesthesia is a state of controlled, temporary loss of sensation or awareness, which keeps us from feeling pain during medical procedures. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Anesthesia Research.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Anesthesia Research. Potential topics include, but are not limited to:

- Analgesia
- Analgesics
- Sedation
- Anesthetic drugs and techniques
- General anesthesia
- Local anesthesia
- Nerve blocks
- Regional anesthesia
- Spinal, epidural and caudal anesthesia
- Acute pain management
- Effects of anesthesia
- Types of anesthesia
- Risks and complications

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Anesthesia Research” should be selected during your submission.
