

## Special Issue on Biochemistry and Molecular Biology

### Call for Papers

Biochemistry is a science that explores the chemical processes within and related to living organisms. It focuses on what happens in our cells, studying proteins, lipids and organelles. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Biochemistry and Molecular Biology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Biochemistry and Molecular Biology**. Potential topics include, but are not limited to:

- Structural and functional biology
- Clinical and medical biochemistry
- Cellular and molecular biology
- Molecular immunology
- Biochemical pathways and mechanisms
- Disease biology
- RNA and protein expression and regulation
- Enzymology
- Molecular pharmacology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Biochemistry and Molecular Biology**” should be selected during your submission.

Special Issue Timetable:

|                     |                 |
|---------------------|-----------------|
| Submission Deadline | June 26th, 2024 |
| Publication Date    | August 2024     |

**Guest Editor:**
