

Special Issue on Artificial Intelligence & Applications

Call for Papers

Artificial intelligence (AI) refers to the simulation of human intelligence in machines that are programmed to think like humans and mimic their actions. The term may also be applied to any machine that exhibits traits associated with a human mind such as learning and problem-solving.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Artificial Intelligence & Applications**. Potential topics include, but are not limited to:

- Computational intelligence
- Unsupervised learning
- Statistical learning
- Knowledge representation
- Natural language processing
- Robotics
- Motion planning
- Human-computer interaction
- Logic-based approach
- Artificial neural networks and convolutional neural network
- Evolutionary algorithms and genetic algorithms
- Deep learning
- Soft computing
- Applications in healthcare, engineering and economics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Artificial Intelligence & Applications**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 22nd, 2020
Publication Date	July 2020

Scientific Research
Open Access

Journal of Computer and Communications

ISSN Online: 2327-5227
